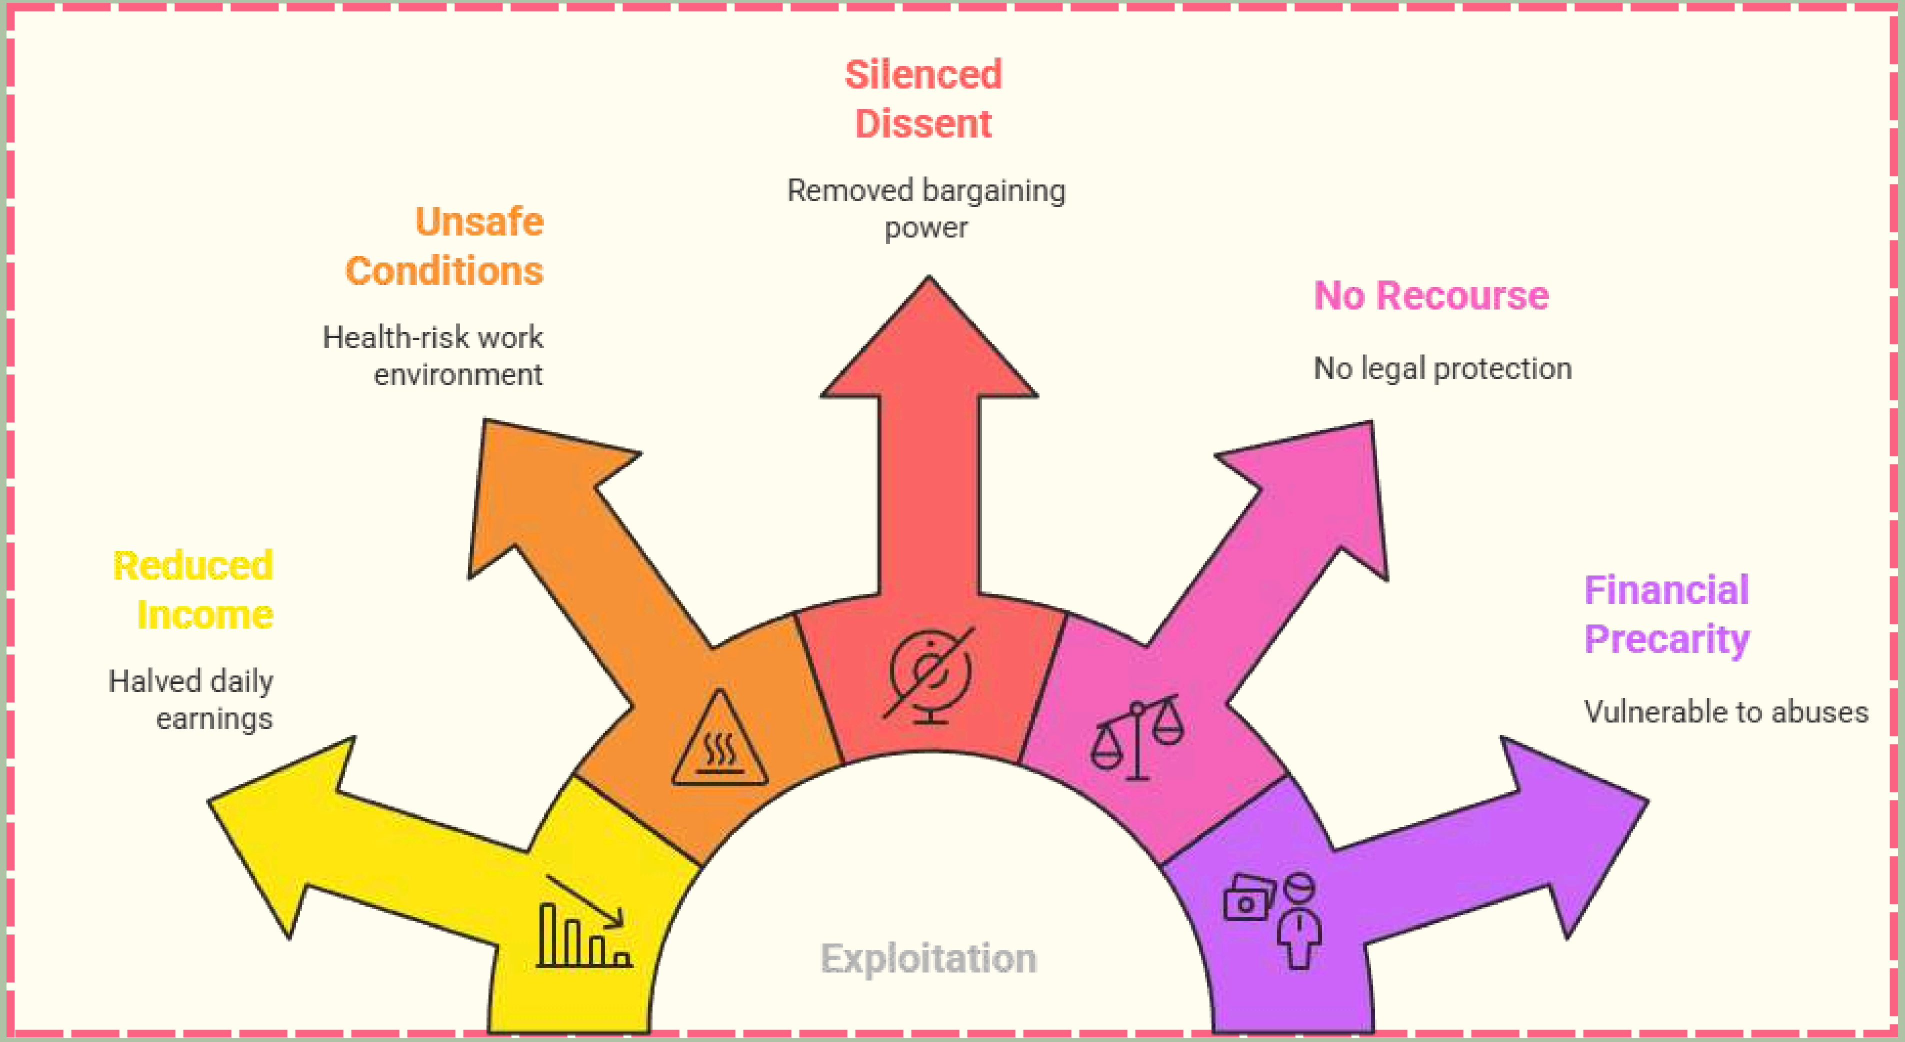
PROBLEM STATEMENT

PRE	MAJOR	POST
Pay rate reduction from 1000 to 500-600/day	strike day 26 april 2025	Company Retailation
Order rate falls from Rs 25 to Rs 15	150 Workers went on strike 15 times to protest unsafe conditions and exploitative pay.	Blinkit blocks worker IDs
	Extreme heatwave (44 °C) intensifies risks	IDs restored only after signing no protest affidavits

ROOT CAUSES ANALYSIS :



Falling pay + unsafe work+ lack of resources =high attrition & protests

Goodwill builds stability

Sector	Value for Companies	Value for Workers	Value added to CRash Fund
FMCG/Retail	Direct reach	Happy customers	Service fees
Telecom	Lock users	Save costs	Revenue share
Banks	Tap credit	Formal loans	Referral fees
Automotive (vehicle)	Loyal buyers	Lower costs	Per-sale

CRaSH

- **Companies**
  - PR branding
  - Actionable Insights
  - Direct customer reach
- **Gig workers**
  - Better welfare benefits
  - Recognition and community
- **Crash policy**
  - Sustainable funding
  - Trusted parntership
  - Public visibilty

IMPACT PARAMETERS

Hybrid infrastructure

- **AI-enabled GPS** identifies road hazards for **safer routes.**
- **QuickPick** counters at restaurants **reduce wait times,** improving worker efficiency.

Safety

- The **VoiceSafe** portal allows anonymous, multilingual reporting of issues.
- It mandates **accident insurance** and rewards safe driving to reduce accidents.

Remuneration

- The model replaces **per-order pay** with a **fixed hourly wage floor**, ensuring **income stability** and prioritizing safety over speed.

Competency

- A centralized fund offers **structured training** and **verifies skills** in road safety and digital literacy, helping workers transition to stable roles.

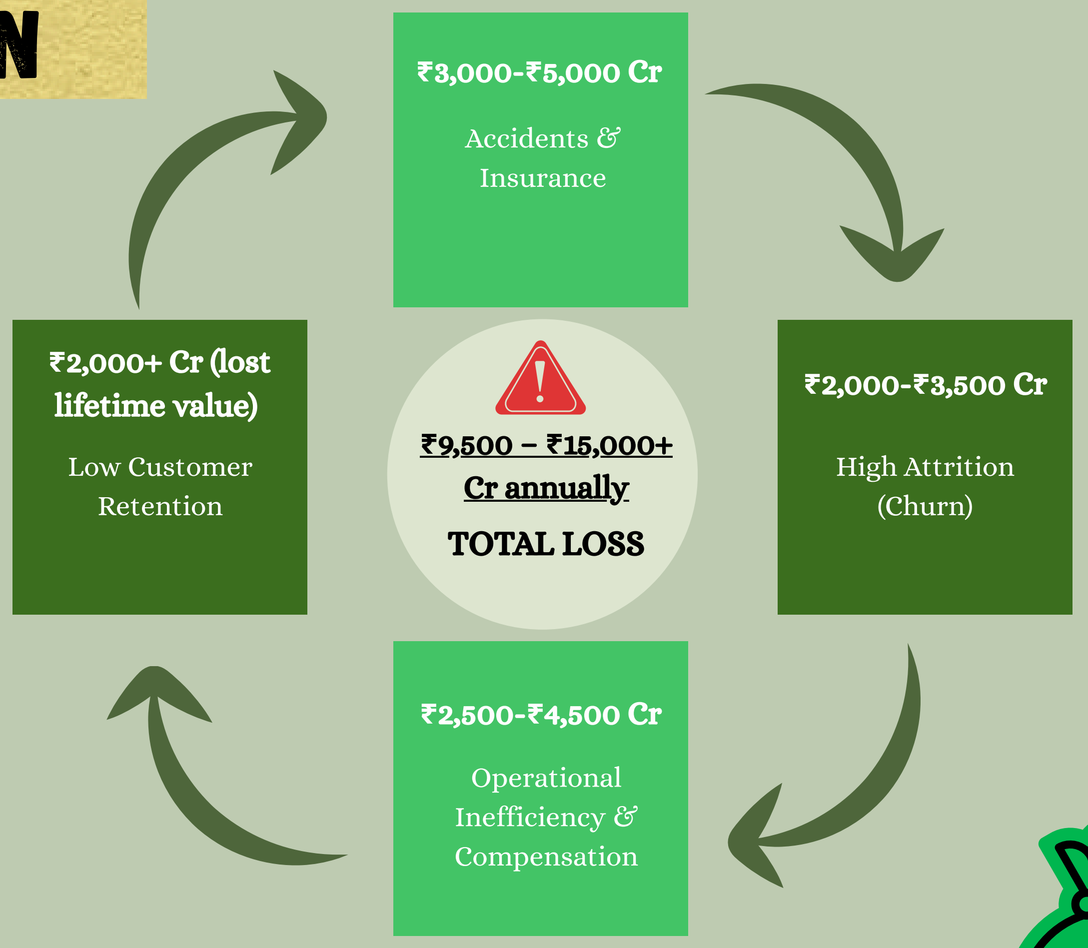
FINANCIAL IMPLICATION

Financial Architecture: Building a Self-Sustaining Fund

1. Core Mandatory Streams (Foundation)

2. Strategic Partnership Streams (Growth Engine)

3. Branding & Publicity: Marathons for Awareness



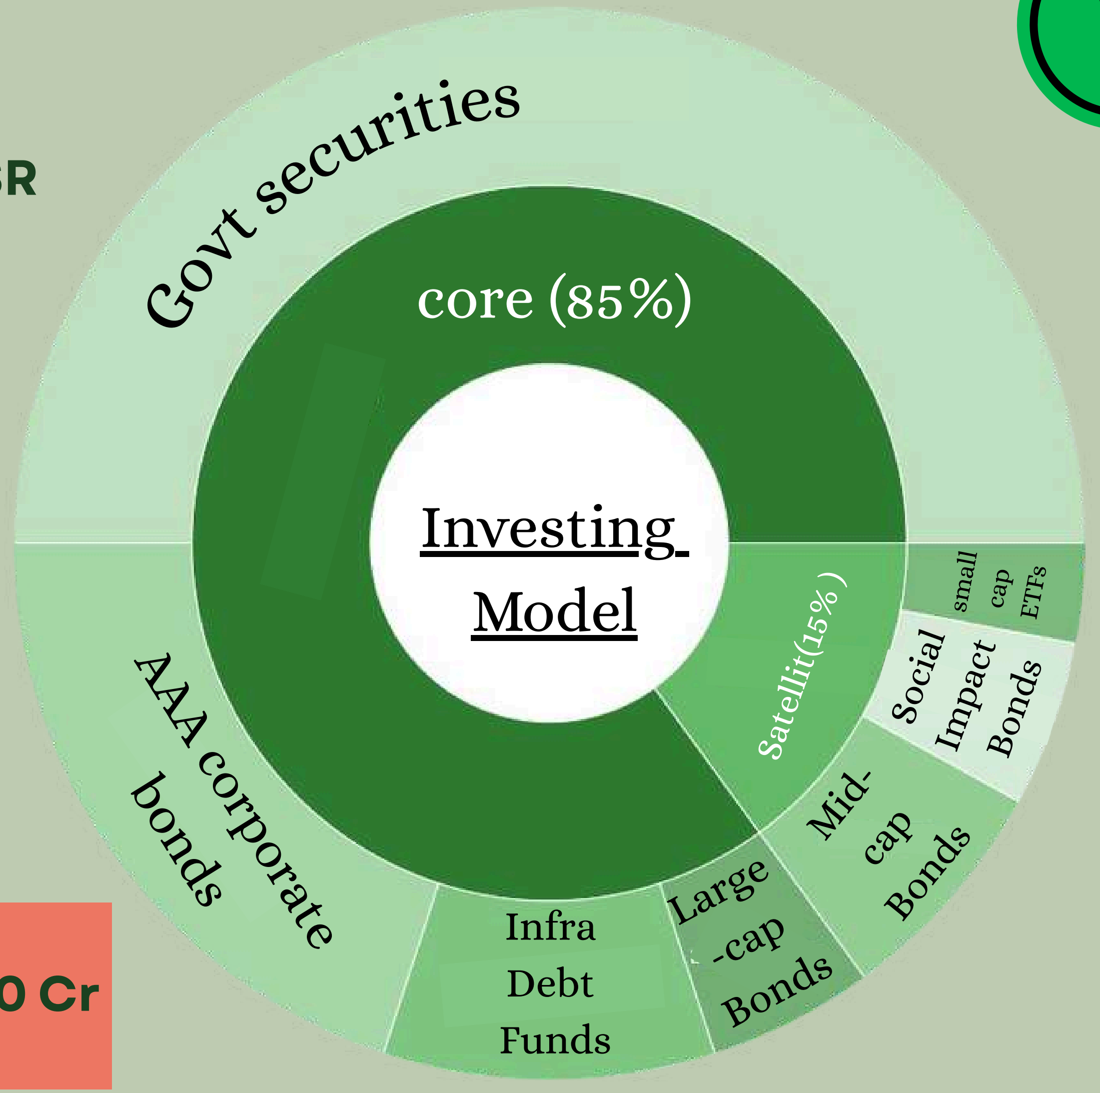
Year 1	Year 2	Year 3	Year 4	Year 5
10 LAKH Workers Covered	20 LAKH Workers Covered	35 LAKH Workers Covered	55 LAKH Workers Covered	70 LAKH Workers
Total Revenue 3943	Total Revenue 4583	Total Revenue 5325	Total Revenue 6186	
Suplus. +345	Gap -403	Gap -1597	Gap -3232	
3255 Ending Capital Pool	3913 Ending Capital Pool	4688 Ending Capital Pool	5679 Ending Capital Pool	Target Achieved 6904 Cr
Solid start. Build reserves.	Double coverage.	Add 15 L workers	Add 20 L workers	

1. Annual revenue (₹ Cr) = 2,520 (Platform Cess) + 1,248 (CSR Diversion = 3,768 ₹ Cr

2. Annual revenue (₹ Cr) = 75 + 50 + 30 + 20 = 175 ₹ Cr

3. Expected Annual Revenue = ₹25–30 Cr

Total Annual Revenue (Core + Partnerships + Marathons): ₹3,970 Cr

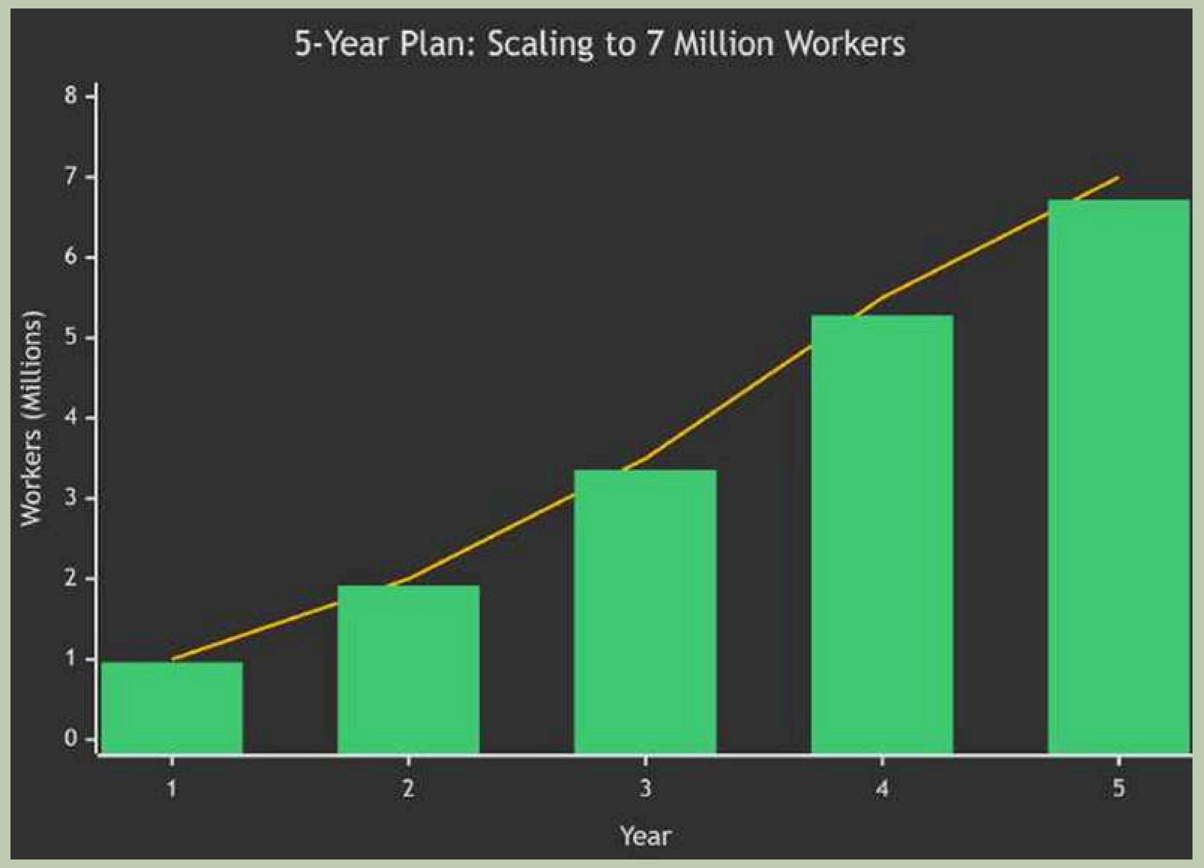


Cess Calculation – The proposed ₹7 platform cess is derived as follows:

Average Order Value (AOV): ₹350 (calculated from data available publicly)

Cess Rate: 2% of AOV

₹350 × 0.02 = ₹7 per order



RISK MITIGATION

REGULATORY DELAY

States may delay implementation and platforms could push back. Mitigation involves piloting the policy in cooperative states to build a proof of concept and using consumer support to pressure for compliance

WORKER ADOPTION AND TRUST

Workers may not trust new portals or training. The policy addresses this through awareness campaigns and incentives tied to the Upskill Wallet.

PLATFORM NON-COMPLIANCE

Platforms might under-report transactions or ignore mandates. This is countered by mandating real-time digital audits and imposing strict penalties.

TIME AVAILABILITY FOR UPSKILLING

Workers may lack time for training due to long hours. The policy offers a hybrid wage model and short, flexible micro-learning modules to fit their schedules.

REVENUE SHORTFALLS AND FINANCIAL GAPS

Economic downturns could reduce funding. This risk is mitigated by diversifying revenues through partnerships and using a stable investment model.

RESTAURANT AND PARTNER BUY-IN

Restaurants may resist implementing new counters. This is handled by piloting with high-volume chains and offering virtual queues for smaller restaurants.

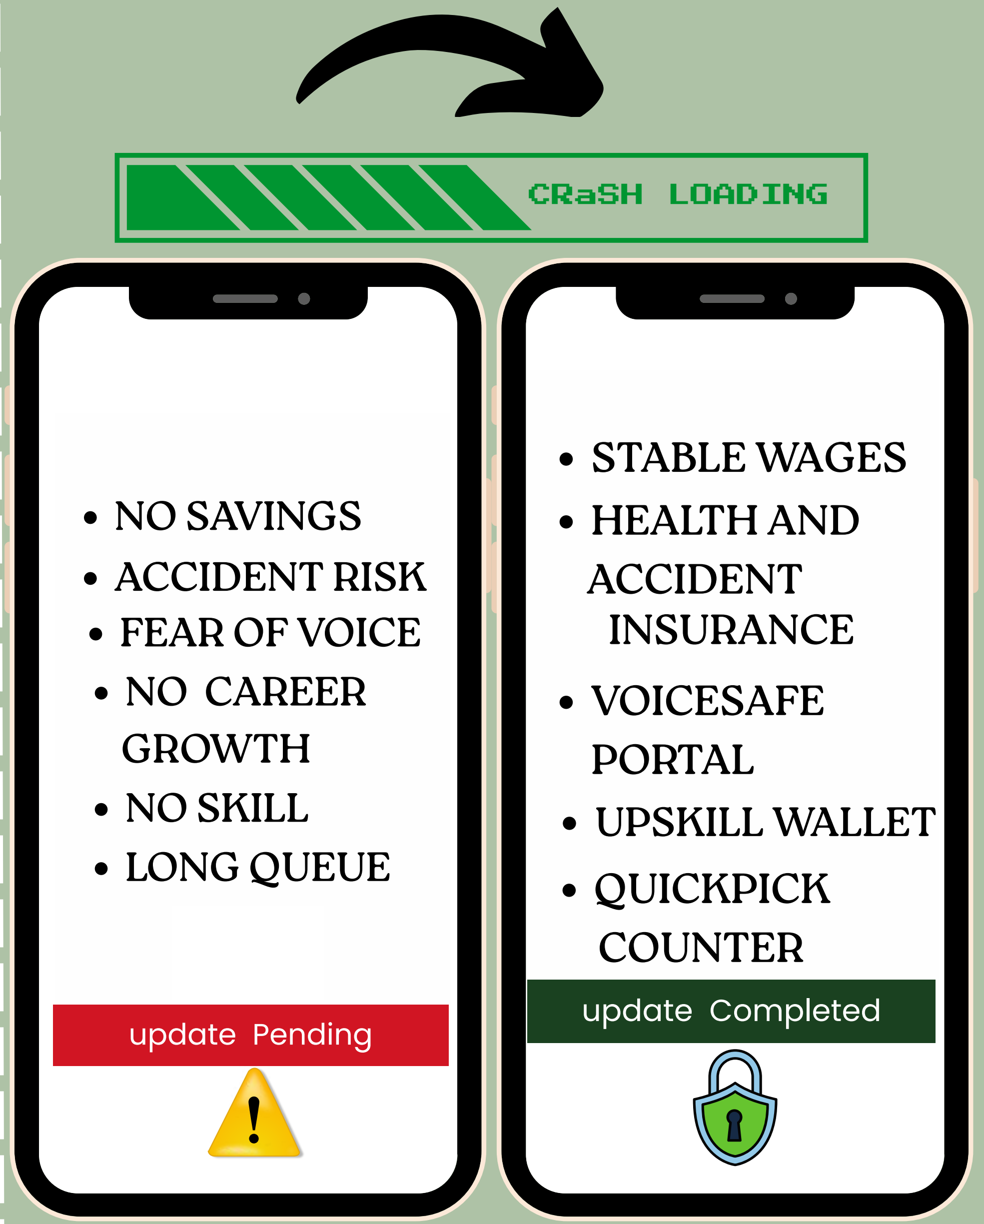
FROM VISION TO VIABILITY

ADDRESSING THE GAPS

Loophole in Old System	CRASH's Solution	Why It Works
Rules exist but aren't enforced.	Mandatory registry and contributions.	Uses proven existing models.
No minimum pay guarantees.	Fixed hourly wage floor with incentives	Simple, predictable, auditable income.
No safe way to complain.	Voice-based grievance portal. (Voicesafe)	Accessible, prevents retaliation.
Fragmented or no benefits.	Full portable benefits package.	Covers health, skills, and future.

STAKEHOLDERS

Group	Who	Why (Interest)
Primary	Gig Workers	Safety ,Income, Dignity
Regulators	Platforms (Swiggy, Zomato), Govt (Labour, MoRTH, Skill)	Compliance, Stable workforce, Road safety
Public Bodies	States, Municipalities, NITI Aayog	Road repair, Skilling, Data insights
Partners	NGOs, Insurers, Banks/Telcos	Welfare, Low-cost cover, Financial access



I'd wait a few more minutes if it keeps riders safe.
86 %
support longer times for safety

I didn't even know they don't get insurance!
63 %
Unaware of no coverage

Paying by the hour is fair.
41 %
Strongly agree on hourly wages

₹2–₹5 extra? I'll happily chip in.
68 %
Yes to surcharge for benefits

Appendix 1: Financial Implications

Sector	Key Platforms	Estimated Daily Orders	Estimated Gig Workers
Food Delivery	Swiggy, Zomato	80 – 90 Lakh	25 – 30 Lakh
Ride-Hailing	Uber, Ola	35 – 45 Lakh	25 – 30 Lakh
E-commerce Delivery	Amazon Flex, Flipkart, Dunzo, Zepto	40 – 50 Lakh	15 – 20 Lakh
Hyper-local Delivery	Blinkit, Instamart, BigBasket	15 – 20 Lakh	5 – 8 Lakh
TOTAL		**~175 – 215 Lakh**	**Around 7 million**

Gig worker welfare should be seen as a strategic investment, not a cost.
India's gig economy loses ₹15,000+ crore annually to accidents, attrition, and churn. Targeted investment in safety, skills, and social security directly reduces these leakages.
The result: Higher productivity, stronger retention, and sustainable platform growth.

Appendix 1: Financial Implications

Loss Category	Reasons	Estimated Annual Cost (Industry-Wide)	Key Impact for Platform
1. Accidents & Insurance	Vehicle damage, liability claims, higher premiums, medical & legal costs.	₹3,000 – ₹5,000 Cr	Direct financial losses , reputational risk.
2. High Attrition (Churn)	Cost of constant hiring, background checks, onboarding, and training new workers.	₹2,000 – ₹3,500 Cr	Major operational overhead , loss of experienced workforce.
3. Poor Skills & Navigation	Inefficient routes, fuel wastage, delivery delays, customer complaints.	₹1,500 – ₹2,500 Cr	Lower productivity, reduced order capacity per worker per day.
4. Customer Compensation	Refunds for late/no-show/wrong deliveries due to worker errors.	₹1,000 – ₹2,000 Cr	Direct revenue loss, customer dissatisfaction.
5. Low Customer Retention	Frustrated customers churn, reducing lifetime platform revenue.	₹2,000+ Cr (lost lifetime value)	Hidden but massive loss of future business.
TOTAL LOSS		**₹9,500 – ₹15,000+ Cr annually**	Threatens profitability & long-term sustainability.

Appendix 1: Financial Implications

Finance & Implementation Blueprint for the CRaSH Framework:

1. Financial Architecture: Building a Self-Sustaining Fund

The CRaSH Fund is designed as a structured economic institution, not a charity.
The CRaSH Fund is designed on three pillars: predictable core revenue, high-value partnerships, and long-term investment growth.

1.1 Core Mandatory Streams (Foundation)

These are predictable contributions from gig platforms and corporates.

Source	Mechanism	Annual Revenue (₹ Cr)
Platform Cess	₹7 levy per transaction	2,520
CSR Diversion	5% of corporate CSR budgets	1,248
Subtotal (Core)		**3,768**

1.2. Strategic Partnership Streams (Growth Engine)

Non-gig companies benefit from CRaSH's access to a national worker base.

Partnership Type	Mechanism	Annual Revenue (₹ Cr)
Data Monetization	Mobility data for city planners & logistics firms	75
FMCG Sampling	Paid samples/coupons in delivery packs	50
Banking & Telecom	Revenue share on worker loans & data plans	30
Fuel & EV Charging	Commission on the national discount program	20
Subtotal (Partnership)		**175**

Cess Calculation – The proposed ₹7 platform cess is derived as follows:
Average Order Value (AOV): ₹350 (calculated from data available publicly)
Cess Rate: 2% of AOV
₹350 × 0.02 = ₹7 per order
CSR Corpus Basis – Estimates for CSR-linked allocations are drawn from the national CSR corpus publicly disclosed by the Ministry of Corporate Affairs, ensuring credibility and alignment with existing benchmarks.

1.3. Branding & Publicity: Marathons for Awareness

CRaSH will host annual city marathons in 15–20 major metros under the banner "Run for the Dignity of Gig Workers."
Revenue model: Title sponsorships, registration fees (public only), and media partnerships.
Expected Annual Revenue: ₹25–30 Cr**.**
Policy impact: Positions CRaSH as a national movement, builds goodwill, and strengthens partnerships.
Total Annual Revenue (Core + Partnerships + Marathons): ₹3,970 Cr

2. Investment Strategy: Core–Satellite Model

CRaSH's strength lies in compounding. Using a Core (Safety) + Satellite (Growth) allocation ensures stability while unlocking upside.
Year 1 Capital Pool = ₹2,779 Cr (70% of revenue).

3. Operational Pool Deployment

The remaining 30% of revenue (₹1,191 Cr in Year 1) funds direct worker benefits.
Upskill Wallet: ₹840 Cr : ₹500/month credits.
Health Insurance Subsidy: ₹351 Cr : premium reduction via co-pay with platforms.

Appendix 1: Financial Implications

Asset Class	Risk	Purpose	Allocation	Amount (₹ Cr)	Return (p.a.)
Core (85%) – Safety					
Govt Securities	Very Low	Anchor stability	50%	1,389	7.00%
AAA Corporate Bonds	Low	Steady income	20%	556	8.00%
Infra Debt Funds	Low-Med	Nation-building + returns	10%	278	9.00%
Large-Cap ETFs	Medium	Growth + dividends	5%	139	12.00%
Satellite (15%) – Growth					
Mid-Cap ETFs	Med-High	Growth engine	7%	194	14.00%
Small-Cap ETFs	High	Aggressive growth	3%	83	16.00%
Social Impact Bonds	Medium	Mission-linked	5%	139	10.00%
Total Portfolio	–	–	100%	2,779	~9.1%

Strategy:
Apply a 70/30 split (30% operating, 70% capital reserve). Early-year surplus is reinvested to fund later expansion.

Projected Year 1 Return: ₹253 Cr approx
Capital Pool (End of Year 1): ₹3,032 Cr approx

Appendix 1: Financial Implications

5-Year Growth Plan: Scaling to 70 Lakh Workers

Year	Workers Covered	Operational Need	Total Revenue	Op. Pool Available	Surplus / (Gap)	Ending Capital Pool	Growth Action
1	10 Lakh	**960**	3,943	1,305	**345**	**3,255**	Solid start. Build reserves.
2	20 Lakh	**1,920**	4,583	1,517	**-403**	**3,913**	Double coverage.
3	35 Lakh	**3,360**	5,325	1,763	**-1,597**	**4,688**	Add 15L workers.
4	55 Lakh	**5,280**	6,186	2,048	**-3,232**	**5,679**	Add 20L workers.
5	**70 Lakh**	**6,720**	7,188	2,379	**-4,341**	**6,904**	**Target Achieved.**

Phased Rollout Roadmap
(All figures in ₹ Crores)

How the Model Works
Year 5 Detail:
Need for 70L Workers: 70 Lakh × ₹9,600 = ₹6,720 Cr
Op. Pool Available: ₹2,379 Cr Gap: ₹2,379 - ₹6,720 = ₹4,341 Cr

How it's Covered: This gap is comfortably covered by the combination of: The growth in annual revenue (which is ₹1,000+ Cr more than Year 1). The investment returns generated by the large and growing Capital Pool (which is nearly ₹7,000 Cr by Year 5).

Appendix 2: Reasons to revenue growth assumptions :

Streams	Growth driver	Why it is realistic and sustainable
Platform Cess (₹7 per transaction)	• More orders in Tier-2/3 cities • Metro users increase frequency • New gig sectors added • Economic growth boosts spending • Upskill Wallet improves workforce → higher demand	• The gig economy is still expanding; better workforce → better service → more transactions. • The per-transaction model scales directly with platform volume, making it predictable. • per-transaction model is inherently scalable and low-risk. As the platform's Gross Merchandise Volume (GMV) grows, the revenue grows predictably.
CSR Diversion (5% of CSR corpus)	Higher corporate profits grow CSR pool • More companies cross CSR threshold • Policy stability attracts investment • Reputational push to fund gig welfare	• The CSR corpus in India is rising yearly; 10% growth aligns with overall GDP & profit growth. The 2% mandate guarantees a stable share flows into the fund. It's a diversified, non-cyclical revenue stream tied to corporate profitability, not platform-specific risks.

Appendix 3: QuickPick Counter:

QuickPick Counter Concept:
Design: A small, branded section (like a kiosk or side-shelf near the reception), optimized for order handoff only.
Operation: Orders ready for pickup are placed here by staff; delivery workers scan/order ID, grab, and go.

Benefits:

- Reduces crowding inside the dining area.
- Saves workers' time by cutting unnecessary interactions.
- Maintains restaurant ambience for dine-in guests.
- Costs minimized since it uses the existing reception space with light modifications.
- Restaurants installing QuickPick counters will receive a reduced platform fee and a "Preferred Partner" badge in the app, enhancing both margins and customer visibility.

Root Cause Category	Impact
1. Exploitative Pay	Income halved to ₹500/day for 14h work.
2. Lack of Safety	Forced into unsafe, health-risk conditions.
3. Algorithmic Control	Silenced dissent, removed all bargaining power.
4. Regulatory Gap	No legal recourse for wages or safety.
5. Financial Precarity	Made workers vulnerable to all other abuses.
